

Amendments to the Specification:

On Page 1, please replace the last paragraph on page 1 with the following rewritten paragraph:

-- This object is met by an extruder tool ~~with the features indicated in claim 1~~ for producing a cylindrical body, which consists of plastic mass and has at least one recess extending in the interior thereof. The extruder tool includes an extruder nozzle with a tapering region and a nozzle mouthpiece, which forms a cylindrical channel, and a carrier device at which a number, which corresponds with the number of internal recesses, of threads is fastened or which has a number, which corresponds with the number of internal recesses, of channels for threadlike pressing of a volatile filler material into the mass flow. The carrier device consists of a number, which corresponds with the number of internal recesses, of carrier elements and each of the carrier elements is fastened to the extruder nozzle in the region of the nozzle mouthpiece or in the tapering region, wherein each of the carrier elements (3, 4) is adjustable in radial direction. Advantageous refinements and developments of the invention are ~~evident from the dependent claims~~ discussed below. --
